eBackOffice 7.3 Release Notes

System Manager

New Features 1

Security Groups 1

Change Company 1

Open Issues 2

Documentation 2

New Features

Overview

Description This section describes the new features you need to be aware of as you install and use this application. Download previous release notes from http://www.epicor.com to review features added in prior releases.

Security Groups

Description Security for user permissions has been expanded to allow group security.

Group Maintenance

A new Group Maintenance window has been added to allow setup of group security rights. You can create security groups for specific user groups such as companies, applications and options and assign users to the group.

Group Security

A new Group Security window has been added where you assign specific company and application rights to the group.

Change Company

Description The Change Company form now has wider Control Database and Company database name fields to permit longer company names. In addition, the drop down list views have been expanded to show a longer list of databases in a single view.

Open Issues

Overview

Introduction This document lists System Manager issues identified since version 7.2.

Issues on the Web Information about open issues will be published on the Epicor web site at http://www.epicor.com. At the web site, go to the Support and Services section, For Customers. This area of the web site requires a password.

Documentation

Group Security When opening the online help from the Group Security window and the Group Maintenance windows, the table of contents does not open.

Workaround: Click F1 from one of the fields. Next, select a related topic. The main help window will open. You can then navigate through additional topics in the main help window. (SCR 30083)
